## Best Practice 6 -Skill Enhancement Lectures (SEL) Reports 2023-24

**SEL Lecture-** Android App Development

**Guest Speaker-** Mr. Vedant Prabhu, Software Application Developer at CL Technologies Pvt Ltd

**SEL of subject-** Mobile Communication System (MCS)

**Classes-** Final Year EXTC (D19A, D19B)

**Venue:** B42

**Date-** 16 September ,Saturday

**Time-** 9.30am to 12.30om

**Subject In-charges-** Dr. Rasika Naik, Dr. Saylee Gharge

The workshop began with a welcome note from Riya Gorade (D19A) and the organizing committee. Further, Mr. Vedant Prabhu first introduced himself and his professional background, also sharing with the students how it has helped him attending various hackathons, workshops and exhibitions related to Android Development. Then, he familiarized the students with Android and its architecture and peripheries via a PowerPoint presentation. Once, the students were well settled with the environment and had downloaded 'Android Studio', he helped create basic emulations and applications.

The flow of the workshop was as follows:

1. Android Architecture - Introduction
2. Android Studio - Installation and Initial Configuration
3. Creating new project with Java
4. Activity.XML file configuration
5. Basic Android Widgets - TextView, EditText, Button, ImageView, RadioButton and RadioGroup, CheckBox, ToggleButton, Spinner, SeekBar, etc.
6. Basic registration form design
7. Android Firebase configuration and interaction with Android Studio
8. Basic Notes app demonstration
9. Git and its interaction with Android Studio
10. Uploading and downloading files from Git into Android Studio environment
11. Sharing of important links and resources

He also personally guided the students through every step of the process. Finally, he introduced the students to Firebase and Git and their interaction with Android Studio.

# Vivekanand Education Society's Institute of Technology

(An Autonomous Institute Affiliated to University of Mumbai, Approved by AICTE & Recognized by Govt. of Maharashtra)

A demo notes app using Firebase was also shown to the students. To end the workshop, Dr. (Mrs.) Saylee Gharge extended a vote of thanks and a doubt-solving session was held to ease the students' worries and problems.

**SEL Lecture-** 10000 Feet Cloud

**Guest Speaker-** Mr. Dabeer Shaikh , Cloud Consultatnt, Google Technologies

**SEL of subject-** Cloud Computing

**Classes-** Final Year EXTC (D19A, D19B)

**Date-** 10/10/2023

**Subject In-charges-** Dr. Shobhit K, Mrs. Arti S.

On the 10th of October, 2023 a Skill Enhancement Lecture (SEL) for Cloud Computing on the topic, “10000 feet Cloud Overview” was organised for the final year students from the EXTC Department in the Auditorium. The organizing committee consisted of the Cloud Computing and Security (CCS) faculty from both the classes, Mrs. Arti Sawant and Mr. Shobhit Khandare. The speaker for the lecture was Mr. Dabeer Shaikh, who has been working at Google as a Cloud Consultant.

The lecture began with an introduction to Mr. Dabeer Shaikh and his dominant domains. The mic was then handed over to the man himself, and he began with an interesting rhetoric of wanting to

work in the Software Development field despite not liking to code. He explained how he had done his Engineering from a Tier 3 college and due to that didn't get many opportunities. He also went on to say that his scores were not remarkable during his college years, in fact his aggregate was about 54%. He showed the students his career graph, about how he started with companies such as NetMagic Solutions and ICICI Bank and went on to work for Accenture, Microsoft and currently, Google. He then proceeded to explain all the services that are provided by Cloud, over which an application can be deployed without having the knowledge of Java or any other language

He familiarized the students with every aspect of Cloud Computing and its resources, also asking many questions to the audience to keep them engaged and make the session more interactive. He also demonstrated his Learning Management System (LMS) and how it came to be using Cloud Computing. There were several useful and free-of-cost courses on his LMS that would convert one from a Cloud Beginner to a Professional. To contribute to learning, his YouTube channel is also a great resource for the students. To end the session, he motivated the students to learn Cloud if they're not as fluent in programming languages for better job opportunities and also made sure the students understood the importance of Cloud.

As he was departing, he was honored with gifts from VESIT and a round of applause by the engaging audience.

FEEDBACK FORM- Skill Enhancement Lectures (SEL)  
DEPARTMENT OF MCA

CLASS: First Year, Div. A and B [ Semester II ]

RESOURCE PERSON AND AFFILIATION- Mr. Pratik Mahale, Senior Threat Intelligence Consultant, Saudi Telecom Company

SUBJECT TOPIC: Exploring the World of Threat Intel in cyber Security DATE: 19th Jan 2024, 10:30 AM to 12:30 PM

Answer the following questions on a scale of 1-5 (1-Needs Improvement, 2-Satisfactory, 3-Good, 4-Very Good, 5-Excellent)

- A. Was the topic interesting? B. Did the topic improve understanding of the subject?  
C. Did the topic give the industry perspective? D. Did the topic help in preparing for higher studies / entrepreneurship?  
E. Was the session effective?

## Detailed Report

An SEL Lecture on “Scope/Opportunities of VLSI in INDIA” was organized for the TE Students by the Electronics and Computer Science Department of Vivekanand Education Society's Institute of Technology, 1<sup>st</sup> April, 2024. There was active participation during the Q&A session, where attendees had the opportunity to engage with the speaker, ask questions, and share their perspectives on the topic. The lecture provided valuable insights into the trends in the VLSI and various opportunities of VLSI in academics as well as in Industry. By addressing key use cases, challenges, and ethical considerations, the lecture facilitated a deeper understanding of the opportunities and complexities associated with it.

The lecture served as a platform for meaningful discussion and knowledge exchange, underscoring the importance of continued exploration and collaboration in harnessing the power of VLSI and improve outcomes. The speaker provided an overview of the current landscape of VLSI applications. The speaker provided an overview of VLSI, explaining its applications and scope. She further explained about the Higher studies in VLSI domain in IITs.

Future trends and challenges in the realm of VLSI and Semiconductor Technology were addressed, including the need for scalable circuit understanding, designs etc.

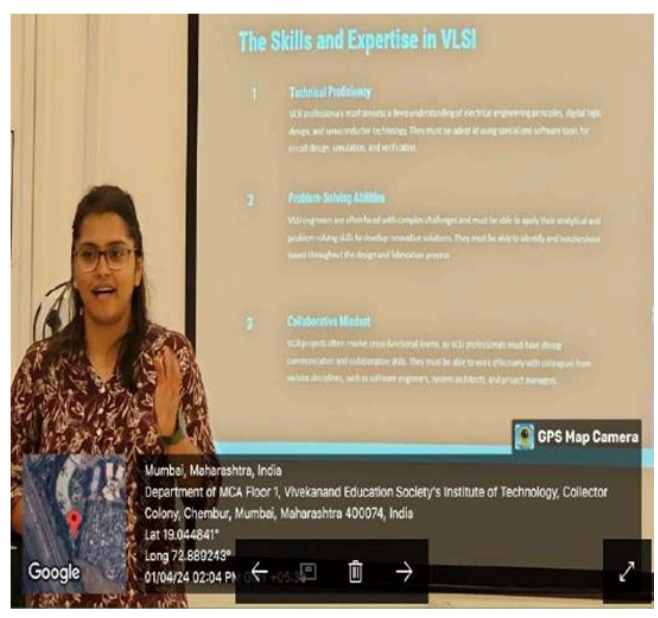

In conclusion, the lecture on " Scope/Opportunities of VLSI in INDIA " provided a comprehensive overview of the evolution and convergence of VLSI. By examining key concepts, trends, and challenges, the lecture fostered a deeper understanding of the integral role played by semiconductor industry in the field of VLSI.

## Detailed Report

The event “Environmental Management Skill Enhancement Lecture”, conducted on 21/02/24 in the VESIT Auditorium, delves into integrating science, spirituality, and social responsibility. Luvneet Khithani, a BSc Microbiology graduate, transitioned from Quality Control Microbiologist to an active volunteer with the Isha Foundation, embracing its transformative programs like Inner Engineering. He embodies the fusion of these elements by contributing to public health and engaging in initiatives for societal well-being and environmental conservation. Through this event, Luvneet shares his insights, highlighting the synergy between science, spirituality, and social responsibility. Attendees gained valuable perspectives on navigating life with purpose, inner transformation, and contributing meaningfully to society and the environment.

Importance of soil: Soil is the bedrock of terrestrial life, serving as a foundational element crucial for ecosystems, agriculture, and human civilization. Its vital functions include sustaining plant growth by providing essential nutrients, water retention, and root anchorage. Beyond agriculture, soil fosters biodiversity, hosting diverse organisms that contribute to ecological balance. It plays a pivotal role in climate regulation through carbon storage and influences nutrient and water cycles. Additionally, soil functions in water filtration, erosion prevention, and supports human infrastructure. Preserving and managing soil health is paramount, as it directly impacts the well-being of ecosystems and human societies, ensuring the continued sustenance of life on Earth.

Nutrients of Soil: Vital for plant growth and overall ecosystem well-being, soil nutrients, encompassing nitrogen, phosphorus, potassium, calcium, and magnesium, are indispensable for biochemical processes like photosynthesis and protein synthesis. Plants derive these nutrients directly from the soil solution or through microbial processes that break down organic matter. Maintaining optimal levels of these nutrients is crucial for achieving robust plant growth,

# Vivekanand Education Society's Institute of Technology

---

(An Autonomous Institute Affiliated to University of Mumbai, Approved by AICTE & Recognized by Govt. of Maharashtra)

maximizing crop yield, and ensuring nutritional quality. Imbalances or deficiencies in soil nutrients can lead to decreased agricultural productivity, ecosystem deterioration, and environmental pollution. Therefore, comprehending soil nutrient dynamics and implementing appropriate management practices are imperative for preserving soil fertility, upholding food security, and mitigating environmental repercussions.

Save Soil: Sadhguru's global initiative, Save Soil, addresses the urgent soil crisis by uniting people worldwide to advocate for soil health. The movement urges leaders to implement policies aimed at increasing organic content in cultivable soil, with a goal of restoring 3-6%. Sadhguru's three-pronged strategy, emphasizes incentivizing farmers to boost organic matter, providing accessible carbon credits, and promoting preferential marketing for produce from soil with higher organic content. Recognizing soil's critical role in sustaining life and agriculture, global efforts must focus on sustainable land management practices, awareness, and policies to preserve soil quality for future generations.

Preserving soil health is essential for global food security and environmental sustainability. Soil degradation, resulting from erosion, pollution, and intensive agriculture, jeopardizes vital nutrients, water, and microorganisms. Climate change exacerbates these issues, with extreme weather events impacting soil erosion and moisture levels. Climate-smart agricultural practices, responsible land stewardship, and sustainable land use planning are paramount in safeguarding soil. Prioritizing soil conservation globally ensures food security, mitigates climate change impacts, and protects ecosystems, reinforcing the urgency of Sadhguru's Save Soil movement.
